

**STANFORD UNIVERSITY MEDICAL CENTER
CYTOPATHOLOGIST/SURGICAL PATHOLOGIST**

The Department of Pathology at Stanford University School of Medicine seeks an academic Cytopathologist/Surgical Pathologist for appointment in the Medical Center Professoriate. The major criteria for appointment for faculty in the MCL shall be excellence in the overall mix of clinical care, clinical teaching, scholarly activity that advances clinical medicine and institutional service appropriate to the programmatic need the individual is expected to fulfill. The academic appointment at the School of Medicine will be at the rank of Assistant Professor. Faculty appointed as Assistant Professors in the MCL will have completed their house staff training and, when appropriate, postdoctoral fellowship training. They should have demonstrated during this training period exceptional qualities and promise to become outstanding clinicians and clinical teachers. If these individuals have not had formal teaching experience, they should have demonstrated during their house staff and fellowship training a commitment to develop the skills necessary for outstanding teaching. They must demonstrate excellence or promise of excellence in a combination of clinical performance, clinical teaching and scholarly activity that advances clinical medicine appropriate to the programmatic need upon which the appointment will be based.

The Department handles approximately 22,500 gynecologic and 4,500 non-gynecologic cytology specimens and 42,000 surgical specimens annually.

Candidates must be board certified in Anatomic Pathology and are required to hold or obtain a license to practice medicine in the State of California. Completion of a Cytopathology Fellowship program and board eligibility or certification in Cytopathology also is required. Additional subspecialty training, in fields such as general surgical pathology, hematopathology, molecular pathology, cytogenetics or immunohistochemistry is desirable. Sign-out responsibilities will include cytopathology, general surgical pathology and frozen section analysis.

The successful candidate will be expected to lead or to contribute to clinical, translational and/or basic research projects and to participate in the training clinical residents and fellows and medical students. Departmental support is available for suitable research projects by faculty whose main responsibilities are in cytopathology and surgical pathology.

Applicants should submit a curriculum vita, as well as a brief description of research accomplishments and plans for future research. These, with the names of three references, should be sent to:

Stephen J. Galli, M.D., Chair,
