Assistant or Associate Director of the Histocompatibility, Immunogenetics and Disease Profiling Laboratory at Stanford University School of Medicine Blood Center
Assistant, Associate or Professor (Medical Center Line or Clinician Educator Line)

The Department of Pathology is seeking an Assistant or Associate Director of the Histocompatibility, Immunogenetics, and Disease Profiling Laboratory at Stanford Medicine for appointment at the rank of Clinical Assistant Professor, Clinical Associate Professor or Clinical Professor in the Clinician Educator Line or at the rank of Assistant Professor, Associate Professor or Professor in the Medical Center Line (MCL), with the faculty rank and line of the academic appointment depending on the applicant’s experience, interests and qualifications.

The individual will share responsibilities with the Directors of the Laboratory for direction and oversight of the clinical laboratory including clinical reporting, clinical consultation, research and development, implementation and validation of novel tests, administrative duties related to the laboratory, and teaching, including training of clinical residents and fellows. Service responsibilities include reviewing and reporting clinical cases; clinical consultation; methods development; all aspects of safety, quality assurance, quality control, personnel and budget management; compliance with applicable accrediting agencies as well as state and federal regulations; and for ensuring that delegated duties are properly performed. Attendance at weekly clinical meetings with transplant services is required. Depending on the experience and interests of the successful candidate, and the results of discussions with the Directors of the Laboratory and the Department Chair, the position could be either as an Assistant or Associate Director of the Laboratory.

The major criteria for appointment for faculty in the MCL shall be excellence in the overall mix of clinical care, clinical teaching, scholarly activity that advances clinical medicine, and institutional service appropriate to the programmatic need the individual is expected to fulfill. The major criteria for appointment for Clinician Educators is excellence in the overall mix of clinical care and clinical teaching appropriate to the programmatic need the individual is expected to fulfill. All candidates must demonstrate excellence or promise of excellence in a combination of clinical performance and clinical teaching that advances clinical medicine appropriate to the programmatic need upon which the appointment will be based. This position requires the ability to interact effectively with faculty colleagues in the department. There are many opportunities for research, for those MCL candidates who wish to pursue clinical, translational or basic research. We also encourage our Clinical Educators to participate in research projects of interest to them, as their clinical and educational responsibilities permit.

The primary responsibilities of the position will be clinical in nature and the individual will be expected to spend the majority of his/her time in evaluation of test results, report sign outs of clinical tests and supervision of the clinical staff. The successful candidate in the MCL will also have the opportunity to develop a research program related to the mission of the laboratory. A wide range of opportunities for research is available, and there is departmental support for research related to the goals of the Laboratory and Department. The department supports high quality basic science, translational and clinical research programs, and directors of service laboratories maintain strong associations with investigators in other basic science and clinical departments on campus. Areas of investigation in the department include genomics, proteomics, cell and developmental biology, biochemistry, cancer biology, cell signaling, immunology and studies of human disease in animal models.

Requirements for the position include an MD or PhD or MD, PhD with demonstrated and recognized experience in human clinical histocompatibility testing and demonstrated expertise in novel test development and/or experience in desensitization programs. Licensure, or eligibility for such licensure, by the State of California as a Histocompatibility Laboratory Director and Board certification at the Diplomate level, or eligibility for such certification, by the American Board of Histocompatibility and Immunogenetics (ABHI) are required.

Applicants should submit a curriculum vitae and bibliography, together with a brief description of past and present clinical and scholarly interests and accomplishments in one pdf document, ideally by July 31, 2015. These and the names of five references should be sent to:
