Assistant or Associate Professor of Pathology at Stanford University School of Medicine and the Veterans Affairs Palo Alto Health Care System.

The Department of Pathology at Stanford University School of Medicine and the Veterans Affairs Palo Alto Health Care System (VAPAHCS) seek an academic pathologist for appointment as Assistant or Associate Professor in the Medical Center Professoriate. Candidates must be board eligible or board certified in anatomic pathology or anatomic and clinical pathology and will be required to hold or to obtain a current license to practice medicine in the State of California. Clinical sign-out activities are expected to include general surgical pathology, autopsy pathology and hematopathology at VAPAHCS and hematopathology at Stanford University Medical Center. A record of significant accomplishment in research and other scholarly activities is required, since the successful candidate will be expected to establish a translational or clinical research program, for which departmental support is available. There will also be extensive responsibilities for the education of clinical fellows, residents and medical students.

The major criteria for appointment for faculty in the MCL shall be excellence in the overall mix of clinical care, clinical teaching, scholarly activity that advances clinical medicine and institutional service appropriate to the programmatic need. The academic appointment at the School of Medicine will be at the rank of Assistant Professor or Associate Professor in the Medical Center Line (MCL). Faculty appointed as Assistant Professors in the MCL will have completed their house staff training and, when appropriate, postdoctoral fellowship training. They should have demonstrated during this training period exceptional qualities and promise to become outstanding clinicians and clinical teachers. If these individuals have not had formal teaching experience, they should have demonstrated during their house staff and fellowship training a commitment to develop the skills necessary for outstanding teaching. They must demonstrate excellence or promise of excellence in a combination of clinical performance, clinical teaching and scholarly activity that advances clinical medicine appropriate to the programmatic need upon which the appointment will be based. Appointment to the rank of Associate Professor in the MCL will be considered for those who have demonstrated excellence in clinical care, clinical teaching, and scholarly activity that advances clinical medicine. Written scholarship that advances the field will almost always be required for appointment to the rank of Associate Professor. There should be evidence that candidates have attained regional recognition as superior clinicians and clinical teachers. There should be evidence that the candidates will successfully fill the programmatic need for which the appointment is made and will make meritorious contributions to their discipline and to the School. There are abundant opportunities for such research, which can include collaborations with colleagues in the Pathology Department and in other departments at the University for the selected candidate with research interests. Academic rank will be commensurate with experience and accomplishments.

Applicants should submit a curriculum vitae and bibliography together with a brief description of past and present scholarly interests and accomplishments, and a concise statement of plans for future research by April 4, 2008. These and the names of three references should be sent to:

Stephen J. Galli, M.D., Chair,
