GASTROINTESTINAL (GI) PATHOLOGISTS (3 positions)
ASSISTANT, ASSOCIATE OR FULL PROFESSOR (Medical Center Line or University Tenure Professoriate)

The Stanford Department of Pathology is seeking to expand the number of physician-investigators in the gastrointestinal diseases (GI) subspecialty group and will hire up to 3 new faculty members in all ranks of the University Tenure Line (UTL) and Medical Center Line (MCL) Professoriate with one position reserved for an experienced senior GI pathologist. Stanford Medicine is committed to the vision of precision health leading the biomedical revolution. The Department of Pathology fully embraces this inspired vision as we work closely with our colleagues in Stanford Health Care, Stanford Children’s Health, and Stanford University School of Medicine. We are seeking ambitious colleagues who are enthusiastic about our vision and committed to our collaborative approach.

The major criteria for appointment for faculty in the MCL are excellence in the overall mix of clinical care, clinical teaching, and scholarly activity that advances clinical medicine. The predominant criterion for appointment in the University Tenure Line is a major commitment to research and teaching often combined with clinical responsibilities.

The Department handles over 50,000 anatomic pathology specimens annually with approximately 22,000 in GI pathology. A major expansion for gastrointestinal clinical care in Stanford Medicine is scheduled to open in 2017 and is expected to increase significantly sample volumes. Duties will include sign-out responsibilities in GI pathology and, depending on focus, appropriate research laboratory space or possibly responsibilities in other specialty area(s) such as molecular pathology.

Candidates must be board certified in Anatomic Pathology or Anatomic and Clinical Pathology. The position requires holding or obtaining a license to practice medicine in the State of California. Completion of subspecialty fellowship training or comparable experience is desirable.

Applicants should submit your curriculum vitae, as well as a brief description of research accomplishments and plans for future scholarly work (in one pdf document). These, with the names of five references, should be sent to Thomas J. Montine, MD, PhD., Professor and Chair, tmontine@stanford.edu

Stanford University is an equal opportunity employer and is committed to increasing the diversity of its faculty. It welcomes nominations of and applications from women, members of minority groups, protected veterans and individuals with disabilities, as well as from others who would bring additional dimensions to the university’s research, teaching and clinical missions.
