DIRECTOR OF SURGICAL PATHOLOGY

In this position, the selected candidate will have major responsibility for all of surgical pathology diagnostic services including gynecologic pathology, neuropathology, renal pathology, uropathology and general surgical pathology. The Stanford Department of Pathology provides diagnostic services to Stanford Hospital & Clinics and Lucile Packard Children’s Hospital with approximately 50,000 tissue specimens reviewed annually. The Department has extensive ancillary support laboratories that include immunohistochemistry, flow cytometry, molecular genetic pathology and cytogenetics.

Candidates must be board-certified in Anatomic Pathology, must have both extensive experience and a record of significant achievement in a high level administrative role in a surgical pathology service at a large academic medical center and/or national reference laboratory, and will be required to hold or obtain an unrestricted license to practice medicine in the State of California. The successful candidate will have at least 7 years of experience as a practicing pathologist in a complex medical school environment, broad competency in surgical pathology, widely-recognized scholarly contributions, a strong publication record, proven leadership and supervisory skills, and excellent verbal and written communication skills. Because the Anatomic Pathology Services at SUMC provide services to both adult and pediatric patients, experience in pediatric pathology would be considered especially attractive.

The academic appointment at the School of Medicine will be at the rank of Associate Professor or Professor in the Medical Center Line (MCL) depending on the qualifications of the selected candidate. The major criteria for appointment for faculty in the Medical Center Line shall be excellence in the overall mix of clinical care, clinical teaching, and scholarly activity that advances clinical medicine, and institutional service -- appropriate to the programmatic need the individual is expected to fulfill. There are abundant opportunities for such research, which can include collaborations with colleagues in the Pathology Department and in other departments at the University for the selected candidate with research interests. Applicants should submit her or his curriculum vitae, as well as a brief description of accomplishments and future plans. These, with the names of five references, should be sent to:

Stephen J. Galli, M.D., Professor and Chair
C/O Ms. Cynthia Llanes
Department of Pathology
